Introduction

Bubble Consult is a progressive business consulting firm dedicated to providing innovative solutions and strategies to help businesses scale and thrive. As part of their growth strategy, they needed a modern, responsive website that would enhance their online presence, engage their audience, and streamline client interactions.

Objectives

- Business Scaling: Develop a website that supports Bubble Consult's goals for scaling their business by providing a strong digital platform to attract and retain clients.
- Responsive Design: Ensure the website performs seamlessly across all devices, including mobile phones, tablets, and desktops.
- Dynamic Testimonials Carousel: Implement a carousel feature in the website to show the client testimonials
- Contact Form Integration: Create an intuitive contact form to facilitate easy communication between potential clients and Bubble Consult.

User Story #1

Title: Scalable business website

Description:

- As an owner,
- I want to have a website designed to support and facilitate business growth,
- So that the website can effectively offer enhanced features and help attract and convert more customers as the business expands.

Acceptance Criteria:

- The website should load quickly and efficiently, with optimized images, scripts, and other resources to ensure a smooth user experience
- The website should include effective lead generation features such as contact forms, social media links, and subscription forms

User Story #2

Title: Responsive website

Description:

- As an owner,
- I want to have a website that provides a consistent and optimized user experience across all devices (mobile phones, tablets, and desktops),
- So that my customers can easily access and interact with the site regardless of the device they are using.

Acceptance Criteria:

- The website should automatically adjust its layout and content based on the screen size and orientation of the device.
- The design should be fluid and adaptable, ensuring that content is displayed properly on small screens (mobile phones), medium screens (tablets), and large screens (desktops).

User Story #3

Title: Carousel in website

Description:

- As a product owner,
- I want to feature a carousel displaying customer testimonials on my website,
- So that I can effectively showcase positive feedback and build credibility with potential customers.

Acceptance Criteria:

- Users should be able to manually navigate through testimonials using next and previous buttons.
- Testimonials should also automatically rotate at an interval (e.g., every 5 seconds)

User Story #4

Title: Contact form for user queries

Description:

- As a product owner,
- I want to provide a contact form on my website,
- So that users can easily submit their queries or messages directly through the website.

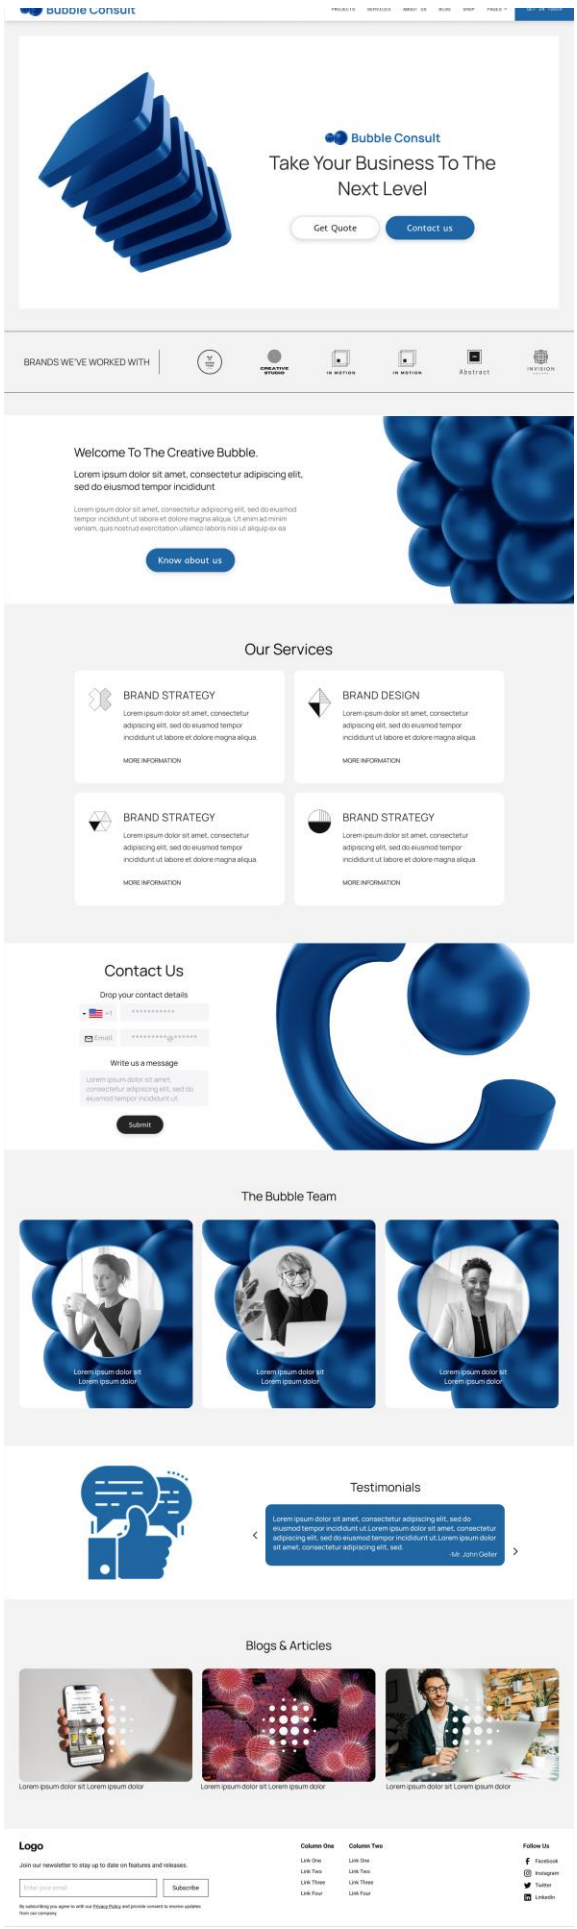

Acceptance Criteria:

- Implement form validation to ensure that all required fields are correctly filled out and that the email address is in the proper format
- After submission, display a confirmation message or thank-you note to the user indicating that their message has been received.
